6. General Product Categories Listed Alphabetically, Indicating:

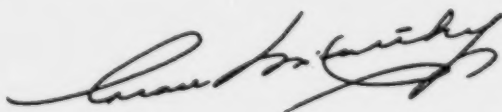

- Product Category
- Company Name in Alphabetical Order

MESSAGE FROM THE MINISTER

British Columbia manufacturers and importers are reaching out to the world as never before to develop new business ventures. The Government of British Columbia is with them every step of the way, providing business services, information and a free-enterprise environment.

This directory is just one way my Ministry of Economic Development promotes business-to-business contacts around the globe.

We invite you to use this book in conjunction with the British Columbia Manufacturers' Directory. Together, they're an efficient way to locate a variety of products and opportunities throughout British Columbia.

Honourable Grace M. McCarthy
Minister of Economic Development
Government of British Columbia

INTRODUCTION

The focus of this directory is on companies primarily engaged in buying and selling, on a commission basis, products owned by others. They may be known as auction companies, commission merchants, import agents or brokers, manufacturers' agents, purchasing agents, etc. Wholesalers, which are companies engaged in buying and selling merchandise on their own account, are included as well for a limited selection of product categories. These wholesalers also indicated that they were interested in taking on new product lines.

The first section of the directory (the Company Listing) lists the company names in alphabetical order, together with the product lines as described by each company, the key executive, and the company's market area.

The second section (the Product Index) provides an alphabetical listing of the products that are mentioned in the Company Listing, citing the companies that deal in each product. Because the product names are not standardized in any way, only a few companies are typically listed for each product, and some experimentation may be needed to locate a specific item.

The third section (General Product Categories) uses a system of product names similar to that used for the publication of import/export and manufacturing statistics. These names are quite general, so each category will include more companies than do the categories in the Product Index. The product categories are the same as those that will be implemented in future editions of the British Columbia Manufacturers' Directory, allowing sources of local and imported products to be compared.

Despite some of the restrictions which have been applied to the scope of this directory, listing in future editions will be available to any company wishing to be mentioned. Please use the Information Form on the following page to ensure such a future listing, or to amend your current listing.

**BRITISH COLUMBIA
IMPORTERS AND MANUFACTURERS' AGENTS DIRECTORY**

Please check [✓]

☐ Add the business described below to the next edition of the directory.

☐ Change the current listing for our business.

COMPANY NAME:

MAILING ADDRESS:

STREET
